MEMORANDUM FOR: Director, Office of Legislative Liaison

VIA: Chief, Liaison Division/OLL

FROM: 

Liaison Division/OLL

STAT

SUBJECT: "Pay Banding": New Pay Schedules for  
Telecommunications Officers

1. The Director of Personnel and Communications are planning to implement on 1 October 1984 new pay schedules for some 900 telecommunications officers in the Office of Communications (OC). The new schedules, called "Pay Banding," include five pay schedules with 29 to 32 steps in each schedule. It is now speculated that if the new system functions successfully for this initial group, it would be extended to include about 400 OC technicians, and then to include other Agency groups. "Pay Banding" has been discussed as a possible Agency-wide system that could replace the General Schedule.

2. The Office of Personnel is preparing a memorandum for the DDCI to send to the House and Senate Oversight Committees and to the Office of Management and Budget. While Section 8 of the CIA ACT gives the Agency the authority to implement this change without informing the Committees, it seems advisable to do so. Only one other federal agency is experimenting with the new system. The Department of the Navy has been trying the new schedules at a China Lake, California facility since 1980 and recently received Congressional approval to extend the experiment an additional five years. The Congressional Budget Office will publish cost analysis of "Pay Banding" in about three weeks; reportedly, the study will point out the relatively high cost of this schedule. According to  of Position Management and Compensation Division, Office of Personnel,

25X1

the start-up cost will be an estimated one-half to one million dollars. In the long term, "Pay Banding" might be more cost effective than the General Schedule, but Personnel's cost data is weak and additional analysis is necessary. A task force has been meeting since June to identify the administrative and mechanical procedures needed to support the system.

3. OC management is currently telling OC employees that "Pay Banding" is a revolutionary concept that will allow employees to earn more frequent and consistent pay raises that will bring them up to market place salaries. The General Schedule is being criticized as inflexible and full of barriers that cause long delays in pay increases. OC has made a video tape on "Pay Banding" to send to overseas stations.

4. The Department of State has been told that the Agency is looking at alternative pay schedules, but has not been told the details. Other federal components, such as the Office of Personnel Management and the Navy, are aware of the Agency's serious interest in "Pay Banding".
